Halcyon Developments No. 5 Pty Ltd

**PROJECT COST**  
\$3m

**DISCIPLINES**  
Structural

Halcyon Glades is an over 50's lifestyle community located halfway between Brisbane and the Sunshine Coast in Queensland. The premium over 50's resort-style community houses 176 superior homes, all energy efficient, complemented with top quality facilities and amenities exclusively for those living in the community to enjoy.

Structerre was contracted to perform all structural works for the Halcyon Glades Recreational Club. Our team was involved in the concept stage and has since provided the detailed structural design and compliance inspection. We worked closely with the project architect on the rammed earth feature wall detailing, and exposed timber feature trusses.

The incorporation of rammed earth walls was an interesting part of the project and our team worked hard to get the detailing perfect for the client. Strong communication and regular meetings helped reach a satisfactory outcome with the timber feature trusses.
